## \* Skills

## 🌐 Profile

I started learning web development since I was grade 11. I have a great passion for web development since that time. After joining university I have learned many new skills.I have more than 2 years experience in web development. I often have a great desire to make something new that has a potential to solve a real world problems. I also engage myself in adapting new technologies. To sum up I am a curious person to do something different.
